against Hair Loss

Innovative Systems of diagnosis & treatment

- ❖ Online Forms for Better Patient Experiences
- ❖ The ultimate level of standardization for unrivaled image quality – Photobooth
- ❖ Innovative Micro-Camera System for diagnosis
- ❖ Stereoscopes for improved processing of the grafts

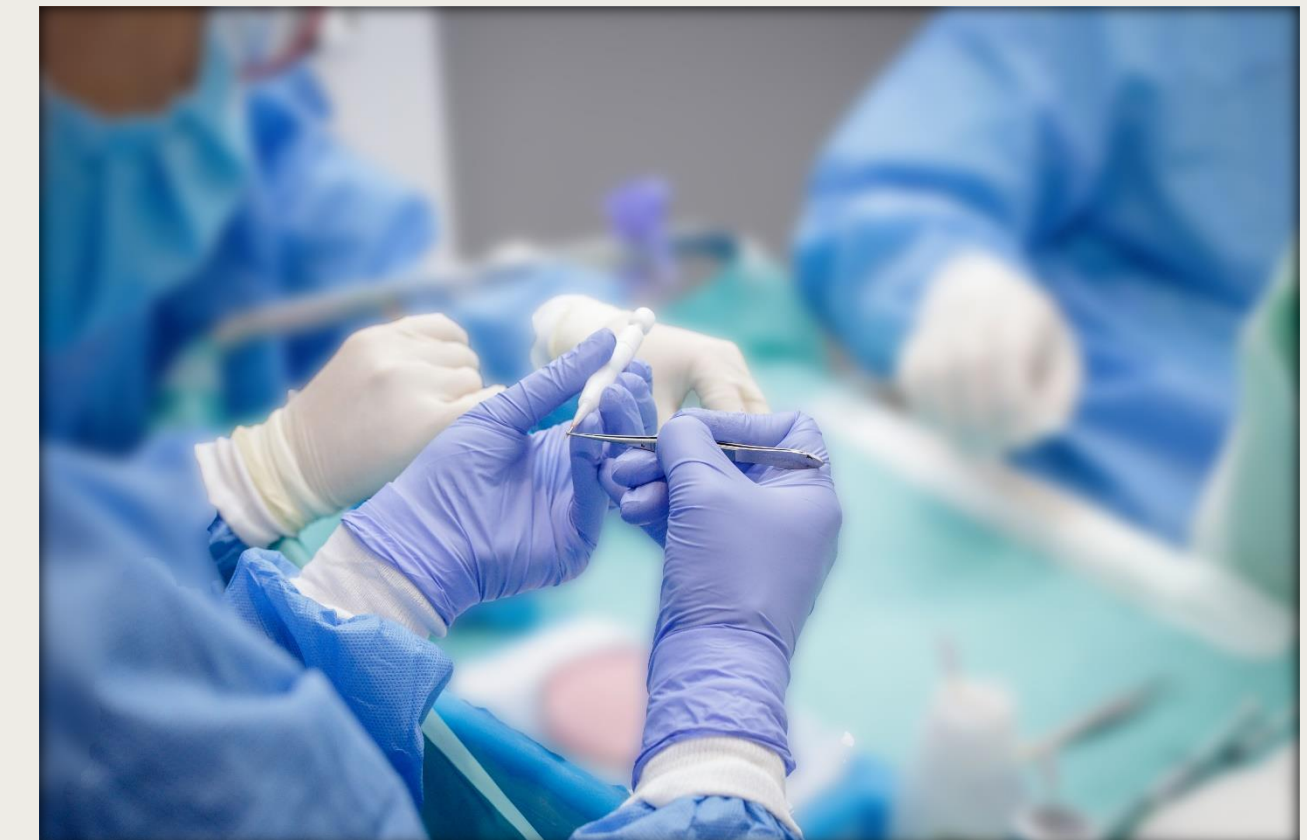

Direct FUE Technique

At SENECA we have developed Direct FUE, a revolutionary system which is the evolution of the “traditional” FUE. With Direct FUE each follicle is placed directly to the affected area with the Implanter, a specially designed tool for hair transplant and hair loss treatment.

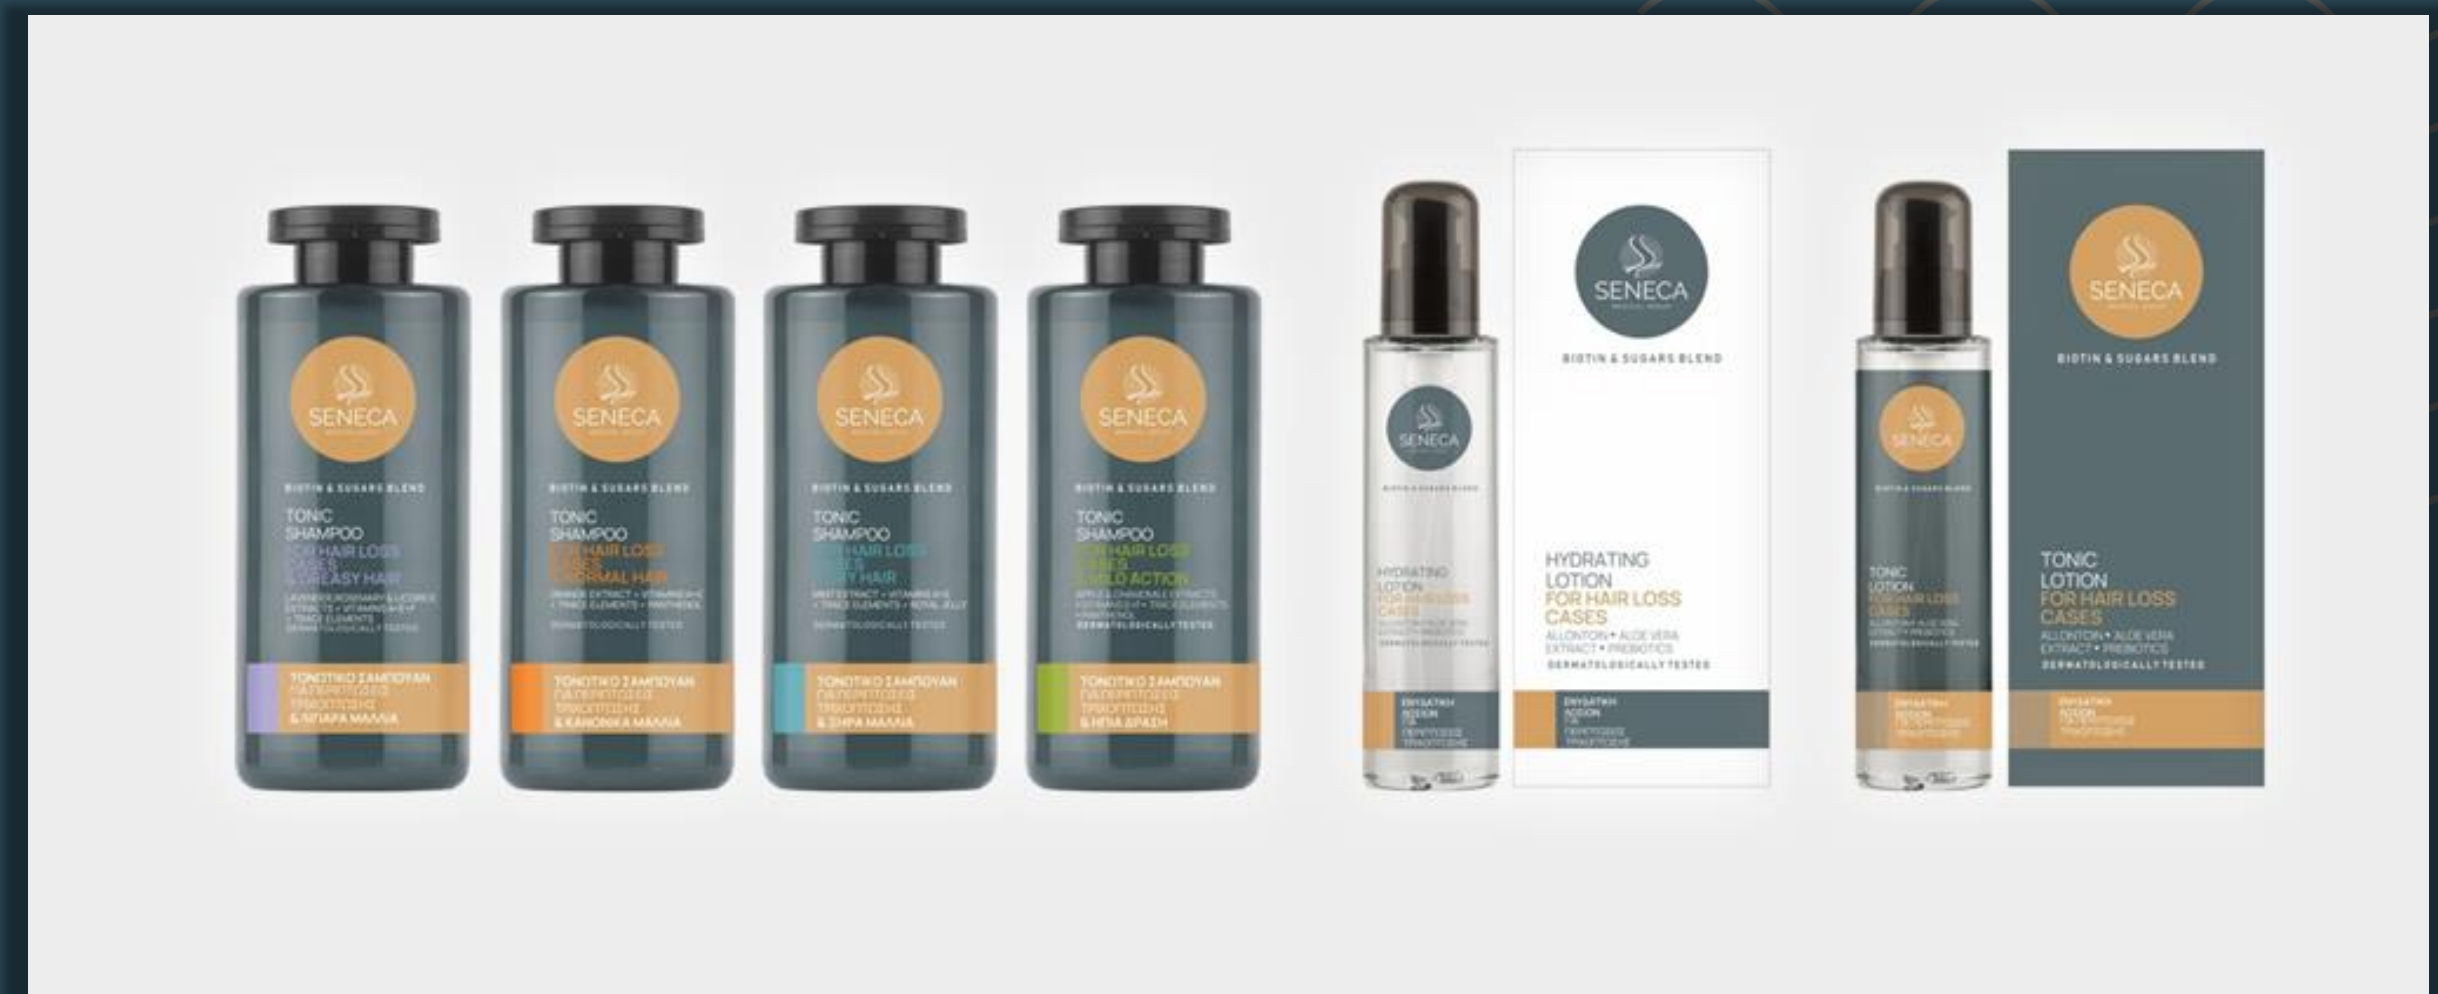

With the Implanter, doctors can control completely the depth, the direction and the angle of placement of each graft. Thus, we can deliver 100% natural result. The Direct system doesn't require incisions prior to placement, and it has higher percentage of growth with no visible marks.

Direct FUE transplant follows a rigorous and strict protocol which ensures safety at all times.

Hairloss Products

Seneca Medical Group has designed a new line of shampoos, lotions and Hair supplements that protect you from hair loss, the SENECA PURE. The products contain natural ingredients from the Mediterranean and a special composition strengthens and tones the hair. All products are ideal for all hair types and can be used by both men and women.

Medical Tourism

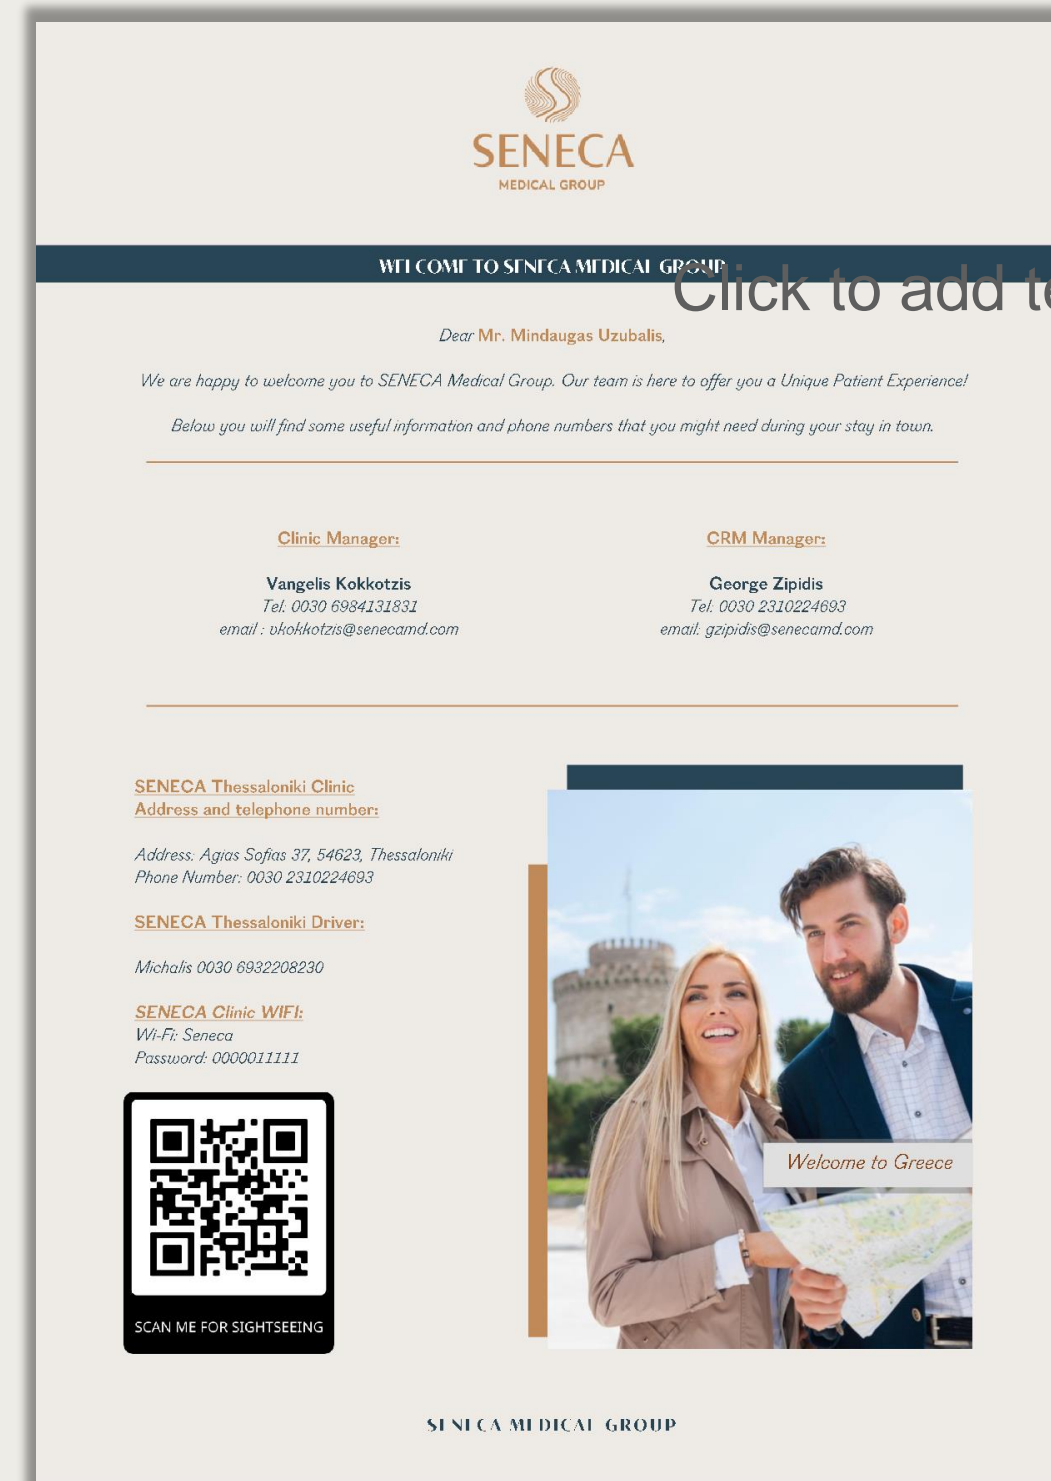

We provide all-inclusive medical tourism packages including:

- Hair Transplant Fee (including 1 PRP Treatment free)
- Single Use Instruments
- Medication during and after session
- All post operative evaluation appointments online or in house
- 2/ 3 Nights of free accommodation to a 4* hotel including breakfast
